

Shashank Mondrati : Sprint 1 Tasks 3&4 Formula Sheet

1. Calculating Impure Price: with the sum of unit price multiplied with quantity of items.:
 $\text{Impure} += (\text{unit_price}) * (\text{quantity})$
2. To calculate total discount: $(\text{quantity} * \text{unit_price})$ and multiplied with $(\text{total_discount}/100)$
3. To calculate pure price: we subtract impure price with totalDiscount
 $\text{PurePrice} : \text{totalImpure} - \text{totalDiscount}$
